NOVUS HELMET

/// CITY / SIZE: XS-2XL

Lightweight outer shell is constructed from an advanced, injection-molded thermoplastic resin for excellent impact protection and optimized levels of weight distribution, comfort and strength. The Novus Helmet is homologated to ECE 22. 05 standards.

Multiple density inner shell constructed from fused closed-cell polymer foam which helps channel impact energy away from the head in the event of a crash and increases mechanical resistance in the event of accidental shock.

Specifically profiled outer shell for excellent aerodynamic performance, offering increased aerodynamic stability at speed.

Open-face design for convenience of entry and increased width and range of vision, plus extended low profile for increased protective coverage.

Adjustable ventilation system features triple air intakes and two exhaust ports. Ventilation system is engineered to guarantee ample and equal internal airflow, keeping the rider comfortable on short or long rides. Vent is activated by a cable slider system allowing the rider to regulate and personalize the level of cooling airflow.

Extended, anti-scratch visor is homologated and is constructed from advanced polycarbonate for strength. Visor offers coverage to lower face when closed and flips up neatly and securely. The visor includes a lock to ensure closure. It is designed to minimize turbulence and reduce aerodynamic noise (in conjunction with the internal padding) in the closed position. Visor is removable and easy to replace.

Built-in internal tinted sun shield visor made of injected polycarbonate offers effective protection from the direct sunlight. Sun shield is anti-scratch. Sun visor is activated by a cable slider system allowing rider to regulate visor according to needs.

Sun shield is removable.

Chin closure system features micro-adjustment buckle for precise and personalized fit.

Premium quality internal padding is constructed from multiple density foam padding for comfort and is especially designed for exceptional facial contouring.

Moisture-wicking comfort textile used throughout helps prevent build-up of sweat. Interior sections are removable and washable.

Internal padding includes adaptive

fit technology allowing helmet to be precisely configured to wide range of head shapes and sizes.

The Alpinestars Novus helmet incorporates A-HEAD adjustment technology which allows the fit to be fully customized. An industry-first, micro-adjustment system, A-HEAD is made up of two patented adjustment structures - one for the adjusting the fit around the circumference of the head - and another for adjusting the fit on the top of the head and improved levels of comfort and security.

Equipped with 'A-Connect', an (optional) Bluetooth bike-to-passenger or bike-to-bike intercom communication system, allowing you to:

- Speak to another 'A-Connect' equipped helmet within a maximum distance of 200m.
- Link your helmet as a hands free headset to your Bluetooth-enabled phone.

RIDE WITH TECH-AIR®

Alpinestars Tech-Air® is the world's most technologically advanced electronic airbag system for street motorcycle riders. Following years of R&D, hundreds of thousands of miles of road testing and a multitude of full-scale crash tests, the Tech-Air® system's innovative design and sensor positioning provides active safety performance in a wide variety of situations.

Tech-Air® is the world's first fully self-contained airbag system to function independently of the motorcycle, with its sensors, electronic control unit and full upper

body airbag system incorporated into an airbag vest worn with an outer jacket.

The Tech-Air® system's sensors detect a rider's impending loss of control with the greatest of precision and, once fired, the airbag will fully inflate within 25 milliseconds. The system's sensors are not required to be fitted to the bike, meaning Tech-Air® can be worn in a variety of riding situations, both on and off-road.

Interchangeable with a choice of Alpinestars compatible riding jackets for all-weather and everyday use, the Tech-Air® street airbag system offers you the highest levels of protection and versatility, combined with true convenience and usability.

Switching the system on before your ride is as simple as zipping up your jacket and regardless of motorcycle or scooter type, age or model – Alpinestars Tech-Air® is there to protect you all the time; whatever the bike, season or surface.
